RE: EPA/PRP Meeting on April 16, 2014
San Jacinto River Waste Pits Superfund Site, Harris County, Texas
Unilateral Administrative Order, CERCLA Docket No. 06-03-10

Dear Mr. Keith:

Thank you for the presentations made by the Potentially Responsible Parties (PRPs) to the Superfund Division Director and staff for the San Jacinto River Waste Pits Superfund Site (Site) on April 16, 2014.

The presentations included a discussion of the Site background, a summary of the remediation alternatives included in the Draft Final Interim Feasibility Study Report, and the PRPs recommendations and rationale for alternatives to remediate the Site. For the northern area, the PRPs' recommended alternative was "3N" (consisting of an enhanced permanent cap, institutional controls, and monitored natural recovery), and the PRPs' recommended alternative for the southern area was "2S" (consisting of institutional controls). The EPA will consider the information presented, as well as all other available information, in evaluating all of the potential alternatives based on the Comprehensive Environmental Response, Compensation, and Liability Act criteria for remedy selection. Please provide a copy of your presentation to the EPA.

A sign-up list of the attendees is enclosed. If you have any questions, please contact me at (214) 665-8318, or send an e-mail message to miller.garyg@epa.gov.

Sincerely yours,

A handwritten signature in black ink that reads "Gary Miller".

Gary Miller
Remedial Project Manager
